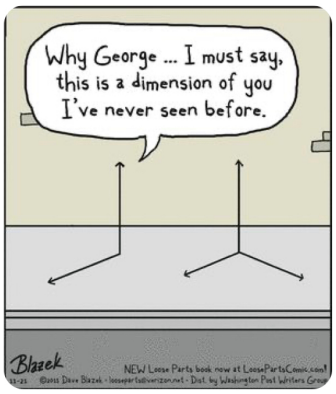
- Due Sep 6 at 11:59pm
- Points 11
- Questions 11
- Available until Sep 7 at 11:59pm
- Time Limit None

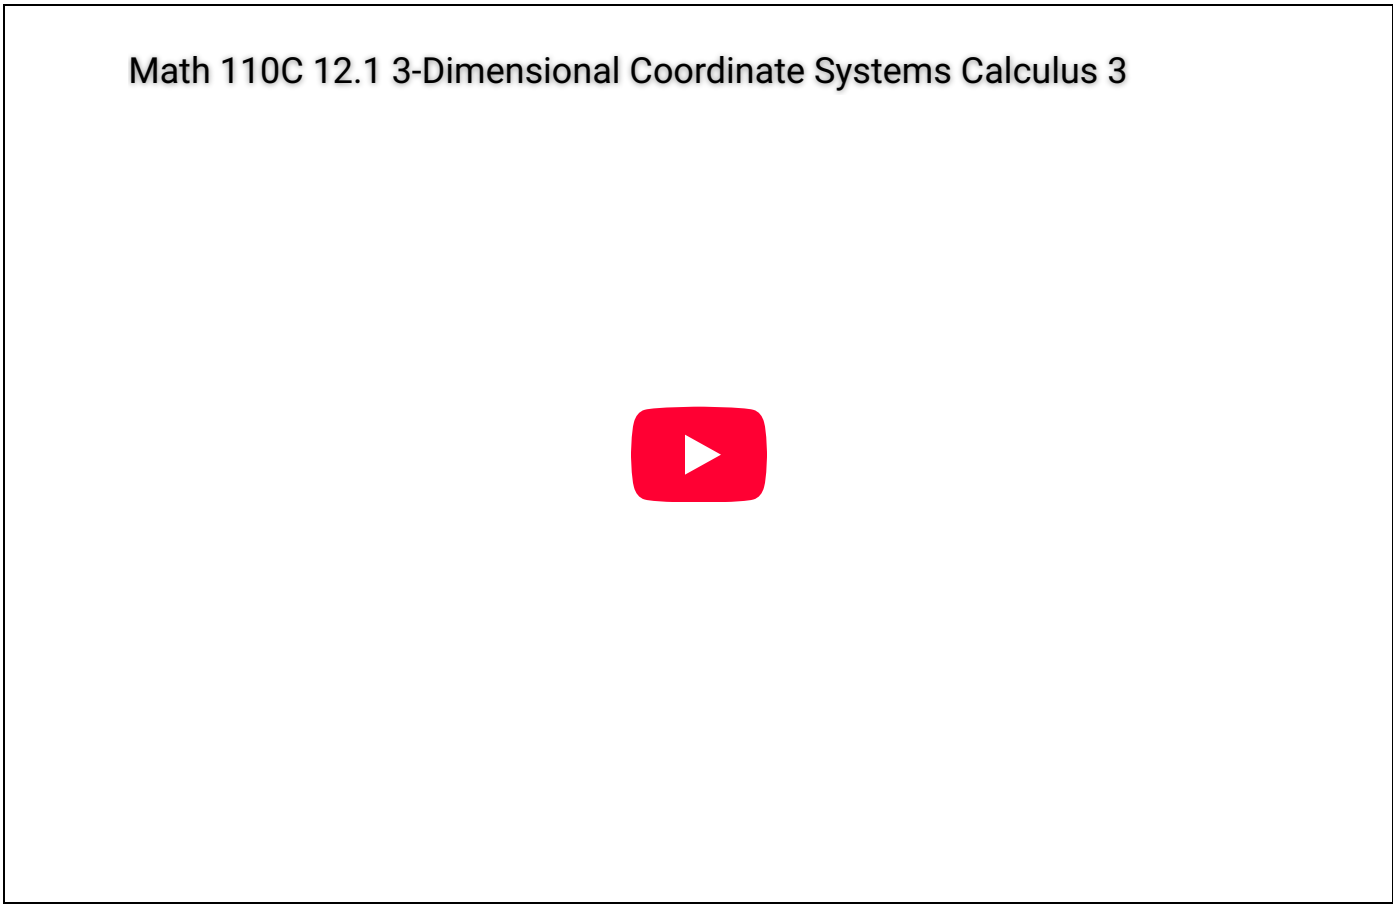
Instructions

Math 110C	3-Dimensional Coordinate Systems (section 12.1)

This corresponds to section 12.1 in your Calculus textbook.



- Here are **lecture notes for you to fill out during our lesson. (https://ccsf.instructure.com/courses/68102/files/14363594?wrap=1) (https://ccsf.instructure.com/courses/68102/files/14363594/download?download_frd=1)**
- Here is our Lesson Video



.

- Read section 12.1 of your Calculus textbook.
- Check your understanding of the lesson by taking the **Lesson Concepts Check (Quiz)** below.

Now, complete the following corresponding homework assignments in the Assignments section of this module.

- **110C HW 12.1A 3D Space, Surfaces**
- **110C HW 12.1B Distance & Spheres**

This attempt took 1 minute.
Correct answer

Question 1
1 / 1 pts

We represent any point in space by an ordered triple (a, b, c) of real numbers.

- (●) True
- ( ) False

Correct answer

Question 2

1 / 1 pts

The direction of the Z-axis is determined by the left-hand rule.

- ( ) True
- (●) False

Correct answer

Question 3

1 / 1 pts

The 3 coordinate planes dived space into 4 octants.

- ( ) True
- (●) False

Correct answer

Question 4

1 / 1 pts

The projection of the point (a,b,c) onto the yz-plane is (0,b,c).

- (●) True
- ( ) False

Correct answer

Question 5

1 / 1 pts

$\mathbb{R}^3$ is the set of all ordered triples of real numbers.

- (●) True
- ( ) False

Correct answer

Question 6

1 / 1 pts

The 1st octant can be described as the set of points whose coordinates are all positive.

- (●) True
- ( ) False

Correct answer

Question 7

1 / 1 pts

In 3-dimensional analytic geometry, an equation in x, y, and z represents a surface in $\mathbb{R}^3$.

- (●) True
- ( ) False

Correct answer

Question 8

1 / 1 pts

The equation y=5 represents the horizontal plane that is parallel to the xy-plane and 5 units above it.

- ( ) True
- (●) False

Correct answer

Question 9

1 / 1 pts

If k is a constant, then x=k represents a plane parallel to the yz-plane.

- (●) True
- ( ) False

Correct answer

Question 10

1 / 1 pts

The distance between the point (x_1, y_1, z_1) and the point (x_2, y_2, z_2) is $\sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2 + (z_2 - z_1)^2}$.

- (●) True
- ( ) False

Correct answer

Question 11

1 / 1 pts

An equation of a sphere with center (h, k, l) and radius r is $(x + h)^2 + (y + k)^2 + (z + l)^2 = r^2$.

- ( ) True
- (●) False
